MEMORANDUM FOR: Chief, Policy and Plans Group

FROM: STAT

                  Policy and Plans Group

SUBJECT: September 1982 SECOM Meeting

REFERENCE: SECOM-A-249

     1. Reference, attached, does not include any substantive
action items that require the attention of the Director of
Security. The main order of business concerns development of
SECOM Seminar agenda topics. The Chairman has offered a few
ideas which should be supplemented to flesh out a two-day meeting
which, incidentally, probably should be attended by Fred in the
role of second Alternate. Suggested topics:

     °   Anything the Director of Security wishes to discuss.

     °   Impact on the Community of the proposed OPM "four-
     tiered" (was five-tiered) system sponsored by OPM.

     °   Present and future role of the polygraph in the
     Community. This can be approached in terms of growth,
     present and future, or as a matter related to leaks.

     °   Funding of security services of common concern.
     The ITC is not going to get everything it needs and
     could use some help. Any new initiatives will have to
     consider the ITC situation and ways to avoid the same
     problem. I would recommend this only as a filler if
     there is nothing else to talk about; the idea of a
     fair-share contribution to ITC is an old dog discussed
     frequently and unproductively in the past.

     °   Extension of ADP links between Community agencies
     not necessarily limited to SCI and 4C; e.g., the link-
     age with Holabird.

     °   Impact of the NSDD 2/82 exercise on the Community
     and SECOM.

          - More SECOM involvement in counterintelligence
          under the broadened application of protective
          security?

FOR OFFICIAL USE ONLY

FOR OFFICIAL USE ONLY

 - Application of any resources that might be
gained.

 - Discussion of priority ranking of, or more
SECOM attention to, hot items in the study
(deficiencies in investigative coverage,
TEMPEST, and computer security).

2. The Director of Security is familiar with any agenda
item suggested or that may develop and no staff work is
required. If he would prefer to work from an outline of
background on any item, we can provide a summary in bullet
form in short order.

Suggested Topics for Discussion at 1982 SECOM Seminar

1. Unauthorized Disclosures of Intelligence - what does the
Community want SECOM to do about them (e.g., central data base, ranking
of leaks for purposes of follow-through, coordination of investigations,
referrals to other departments/agencies)?

2. Security Services of Common Concern - what does the Community
want and would use over and above the existing Interagency Training
Center and Interagency Telephone Laboratory?

3. Relationship Between SECOM and IG/CM - what are potentials for
overlap/duplication and what should be done to avoid them while proceeding
expeditiously to address issues?
